

We hope that any action you take regarding Indiana's Telephone Privacy Law will not diminish it in ANY way. It has been great since this new law was enacted. We no longer have to listen to every "high pressure sales pitch" from these "vermin" who have access to a phone.

We were averaging 6 to 8 calls a day, and some were after 9:00 pm.

Now our calls are almost zero.

We thought that this was finally taken care of when the law was passed. But if the "really stupid bureaucrats" want to return us to the days before this legislation was passed, We have a suggestion for you. Go ahead and legislate the elimination of the caller ID option on our phones, it is a service that we pay for, but it is not necessary. Look at the money we could save!!!!!! We no longer have to screen our calls! And it will be good for new businesses who wish to "harass" people to buy things that they don't really need.. We miss deleting 6 to 8 messages a day with only a hang-up dial tone on our answering machine.. Please wake up and listen to the people: LEAVE INDIANA'S LAW ALONE!
